

# In the beginning, InfoMetrix was there.

1978. The dawn of Chemometrics. Infometrix was there, providing the first commercial chemometric solutions to problems in quality control and exploratory data analysis. A new dimension in chemical analysis was created when ARTHUR was released for the VAX. Later versions of ARTHUR generated applications in optimization, instrument design and much more.

1986. Infometrix is still here providing simple solutions to complex problems. If you need more information from your data and better solutions to your analysis problems, Infometrix can help. Call us.

- **ARTHUR™** Pattern Recognition System for VAX
- **Ein\*Sight™** Exploratory Data Analysis for IBM PC
- **QuickRes™** Curve Resolution for Hewlett Packard's ChemStation for HPLC. (Summer 1986)
- **MCR2™** Curve Resolution and Peak Integration for the HP85/1040A System
- Consulting Service and Support

**InfoMetrix™**

Pattern Recognition for Analytical Systems
