

Chemometrics Training Course Application

Description: This three-day session specializes in hands on training in chemometrics. The course covers topics such as data collection for multivariate analysis, model optimization and model building, classification, regression and data exploration techniques. Methods and tools for on-line, process, routine and automated chemometrics are also introduced to the attendee. Hands on experience and demonstrations are provided for our Pirouette® and InStep™ software packages. Students are encouraged to bring their own data for individualized instruction.

Course location: Infometrix, Inc.; Bothell, WA

Please check the date you will attend: April 7 - 9, 2010
October 6 - 8, 2010

Please choose the package you prefer:

Standard training package	\$1500
Enhanced training package	\$5000
(includes one license for Pirouette software)	

Materials that are included in the course belong to the students at the completion of the course. Payment is due 30 days in advance. Please fill in and print this form, attach your payment (check or money order) to this application for the package indicated above, then mail to the address shown below.

Attendee Information: Please provide all information requested
